OPPORTUNITIES FOR MJ TO MINISTER IN PAKISTAN

CHILDREN'S RALLY AT THE HEAD

About 60 children and 10 leaders gathered on the rooftop of the Pastors' home. Nasir translated for me which made my story telling of Joseph's life and God's plan for him easier to tell. Bible learning games and activities reinforced the theme. The kids wore sashes to represent the Bible characters as I told the story of Joseph. This was the first children's rally at the new church plant in the village. Some kids had never been to church.

THE ROBBIE ORR COMMUNITY CENTER

About 35 kids in the older Sunday School class learned about the theme for the children's rallies "LOOK-LISTEN-OBEY". I taught the kids to look into God's Word. Listen to God and then obey him. It was great to see new kids and others who had improved their Bible skills. Toshiko is working with girls to lead and teach the classes. Pray for these leaders as they teach and the kids to trust God and walk with Him.

GULZEB CHILDREN'S RALLY

About 150 children attended the two hour program which ended with a chicken/rice dish. For many of them food for the body was a highlight but food for the soul to make a difference in their lives was our prayer. Telling the story on the life of Joseph was a good example for their lives. Our prayer is that these children will trust in Jesus and walk with Him. I was encouraged to see leaders who had grown up in the classes. Pray for Dorothea as she continues teaching them how to lead and teach.

Leaders in action

CHRONOLOGICAL BIBLE STORYING SEMINARS

Lahore and Hyderabad sites brought over a 100 leaders for training. In Hyderabad, Asleem our translator did an excellent job. He was able to explain the teaching in such a way that everyone understood. Since our leaving Pakistan; he has taught these seminars in Karachi. There are other leaders who have begun using the storying quilt and methods they learned in the seminars. Thanks for praying.

Kurt taught several story methods. One was using a newspaper for telling Zacchaeus and also the story of the 3 trees.
